

# **EXHIBIT 1**

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13  | Accused Instrumentalities  |
|---|--|
| <p><b>[13.0]</b> A tangible, non-transitory computer readable storage medium including instructions for execution by a processor, the instructions, when executed, cause a control device to implement a method comprising:</p> | <p>Google’s “Cast” technology enables an “Android, iOS, or Web app to direct its streaming video and audio to a TV or sound system,” where the app “becomes the remote control to play, pause, seek, rewind, stop, and otherwise control the media.” <a href="https://developers.google.com/cast">https://developers.google.com/cast</a>.<sup>1</sup> In Google’s “Cast” framework, there are two core categories of devices: (1) “sender” devices, which are computing devices installed with a Cast-enabled Android, iOS, Chrome, or browser-based app accessed via either an app store or Chromecast-enabled site URL<sup>2</sup> (including youtube.com, music.youtube.com, tv.youtube.com, and spotify.com) and (2) “receiver” devices, which are Cast-enabled media players such as an audio or video playback device. <i>See, e.g.</i>, <a href="https://developers.google.com/cast/docs/developers">https://developers.google.com/cast/docs/developers</a>; <a href="https://developers.google.com/cast/glossary">https://developers.google.com/cast/glossary</a>; <a href="https://developers.google.com/cast/docs/ux_guidelines">https://developers.google.com/cast/docs/ux_guidelines</a>.</p> <p>There are many different Cast-enabled Android, iOS, Chrome, or browser-based apps that allow a user to transfer playback of streaming media content from the user’s smartphone, tablet, or computer device to a Cast-enabled media player and then control the Cast-enabled media player’s playback using the Cast-enabled app. This includes Google’s own Cast-enabled apps, such as the YouTube Music app, the Google Play Music app, the YouTube app, the YouTube TV app, and the YouTube Kids app, as well as a host of different third-party Cast-enabled apps, such as the Spotify app. <i>See, e.g.</i>, <a href="https://support.google.com/chromecast/answer/6279384?hl=en">https://support.google.com/chromecast/answer/6279384?hl=en</a>; <a href="https://www.google.com/chromecast/built-in/apps/">https://www.google.com/chromecast/built-in/apps/</a>. These Cast-enabled apps can be installed and run on any smartphone, tablet, or computer device that supports Android, iOS, Chrome, or browser-based apps, including Google’s own “Pixel” smartphone, tablet, and computer devices (<i>e.g.</i>, the Pixel, Pixel XL, Pixel 2, Pixel 2 XL, Pixel 3, Pixel 3 XL, Pixel 3a, Pixel 3a XL, Pixel 4, Pixel 4 XL, Pixel 4a, Pixel 4a (5G), Pixel 5, Pixel 5a (5G), Pixel 6 phones, the Pixel Slate tablet, and the Pixelbook and Pixelbook Go laptops) as well as many third-party smartphone, tablet, or computer device. <i>See, e.g.</i>, <a href="https://store.google.com/us/magazine/compare_pixel">https://store.google.com/us/magazine/compare_pixel</a>; <a href="https://store.google.com/us/product/google_pixelbook_specs">https://store.google.com/us/product/google_pixelbook_specs</a>; <a href="https://store.google.com/us/product/pixel_slate_specs">https://store.google.com/us/product/pixel_slate_specs</a>. For purposes of this chart, any smartphone, tablet, or computer device installed with a Cast-enabled Android, iOS, Chrome, or browser-based app (<i>e.g.</i>, accessed via an app store or Chromecast-enabled site URL) that allows a user to transfer playback of streaming media content from the smartphone, tablet, or computer device to a Cast-enabled media player and then control the</p> |

<sup>1</sup> Additional information regarding the accused instrumentalities is set forth in the Infringement Contention Chart for U.S. Patent No. 10,779,033 (Ex. B), which is incorporated herein by reference.

<sup>2</sup> *See, e.g.*, <https://support.google.com/chromecast/answer/3265953?hl=en>.

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13 | Accused Instrumentalities   |
|----------|---|
|          | <p>Cast-enabled media player’s playback using the Cast-enabled app will be referred to as a “Cast-enabled computing device.”</p> <p>As set out in the Supplemental Infringement Contentions, Sonos has endeavored to list the possible third-party smartphone, tablet, and computer devices that may have been used to download and install one or more accused Cast-enabled apps between May 2018 to present. <i>See</i> Appx. 1. Each of these third-party smartphone, tablet, and computer devices, when installed with at least one Cast-enabled app, meets all elements of the claims as explained in more detail herein. As set forth below, Sonos cites representative examples of Google smartphone, tablet, and computer devices that comprises a tangible, non-transitory computer-readable storage medium that, when installed with a Cast-enabled app, includes executable instructions that when executed by a processor causes the device to carry out the recited functions, but notes that this tangible, non-transitory computer-readable storage medium has become ubiquitous among all smartphone, tablet, and computer devices. Each possible third-party smartphone, tablet, and computer device listed in Appendix 1 contains this aspect and thus meets this element.</p> <p>There are also many different Cast-enabled media players to which playback of streaming media content can be transferred from a Cast-enabled computing device. This includes Google’s own Cast-enabled media players, such as the Home Mini, Nest Mini, Home, Home Max, Home Hub, Nest Hub, Nest Hub Max, Nest Wifi Point, Chromecast, Chromecast Audio, Chromecast Ultra, Chromecast with Google TV, and Nest Audio media players, as well as various other third-party media players with built-in Cast functionality. <i>See, e.g.,</i> <a href="https://store.google.com/us/product/google_home_max?hl=en-US">https://store.google.com/us/product/google_home_max?hl=en-US</a>; <a href="https://store.google.com/us/product/chromecast_google_tv_compare?hl=en-US">https://store.google.com/us/product/chromecast_google_tv_compare?hl=en-US</a>; <a href="https://www.google.com/chromecast/built-in/audio/">https://www.google.com/chromecast/built-in/audio/</a>.</p> <p>Certain of these Cast-enabled media players also include a display screen and firmware that enables the Cast-enabled media players to additionally function as a control device for other Cast-enabled media players. This sub-category of Cast-enabled media players, which will be referred to herein as “Cast-enabled displays,” includes Google’s Home Hub, Nest Hub, and Nest Hub Max media players. <i>See, e.g.,</i> <a href="https://store.google.com/us/product/google_nest_hub?hl=en-US#overview-modal-music">https://store.google.com/us/product/google_nest_hub?hl=en-US#overview-modal-music</a>; <a href="https://store.google.com/us/product/google_nest_hub_max?hl=en-US">https://store.google.com/us/product/google_nest_hub_max?hl=en-US</a>; <a href="https://support.google.com/googlenest/answer/9165738?hl=en">https://support.google.com/googlenest/answer/9165738?hl=en</a>. Similar to the Cast-enabled computing devices, these Cast-enabled displays have Cast-enabled software (e.g., firmware and/or Cast-enabled apps)</p> |

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13  | Accused Instrumentalities  |
|---|--|
|   | <p>that allows a user to transfer playback of streaming media content from the Cast-enabled display to another Cast-enabled media player and then control that other Cast-enabled media player’s playback using the Cast-enabled display’s user interface. For purposes of this chart, Cast-enabled computing devices and Cast-enabled displays may be referred to collectively as “Cast-enabled control devices.”</p> <p>Google also hosts backend software on Cloud-based infrastructure owned and/or operated by Google (sometimes referred to as Google Cloud Platform or “GCP” for short) that facilitates the aforementioned Cast functionality for transferring playback of streaming media content from a Cast-enabled control device to a Cast-enabled media player and/or controlling the Cast-enabled media player’s playback.</p> <p>As described in further detail below, each Cast-enabled control device is a “control device” that comprises a tangible, non-transitory computer-readable storage medium including executable instructions that, when executed by the Cast-enabled control device’s processor, cause that Cast-enabled control device to perform the functions recited in claim 13. Further, each server that hosts at least one of the aforementioned Cast-enabled apps for download onto Cast-enabled computing devices, which is referred to herein as a “Cast-enabled app download server,” comprises a tangible, non-transitory computer-readable storage medium including executable instructions that, when executed by a Cast-enabled control device’s processor, cause that Cast-enabled control device to perform the functions recited in claim 13. Further yet, because each Cast-enabled media player is a data network device (<i>i.e.</i>, a device that is configured to connect to and communicate over a medium that interconnects devices in a manner that enables them to send digital data packets to and receive digital data packets from each other) and is configured to process and output audio, each Cast-enabled media player comprises a “playback device” as recited in claim 13. <i>See, e.g.</i>, Pl.’s Opening Markman Br. (D.I. 60 of 20-cv-881-ADA) at pp. 4-6, 23-26, Exs. 24-25; Pl.’s Reply Markman Br. (D.I. 66 of 20-cv-881-ADA) at pp. 2-3, 10-12, Exs. 26-27; SONOS-SVG2-00018184 - SONOS-SVG2-00018236 [ITC Order No. 20] at p. 15; <a href="https://support.google.com/googlenest/answer/7072284?hl=en">https://support.google.com/googlenest/answer/7072284?hl=en</a>; <a href="https://support.google.com/chromecast/answer/3046409?hl=en">https://support.google.com/chromecast/answer/3046409?hl=en</a>; <a href="https://store.google.com/us/product/nest_wifi_specs?hl=en-US">https://store.google.com/us/product/nest_wifi_specs?hl=en-US</a>.</p> |
| [13.1] causing a graphical interface to display a control interface including one or more | Each Cast-enabled control device and each Cast-enabled app download server comprises a tangible, non-transitory computer-readable storage medium including executable instructions that, when executed by a Cast-enabled control device’s processor, cause the Cast-enabled control device to cause its graphical interface to display a control interface including one or more transport controls to control playback by the Cast-enabled control device.  |

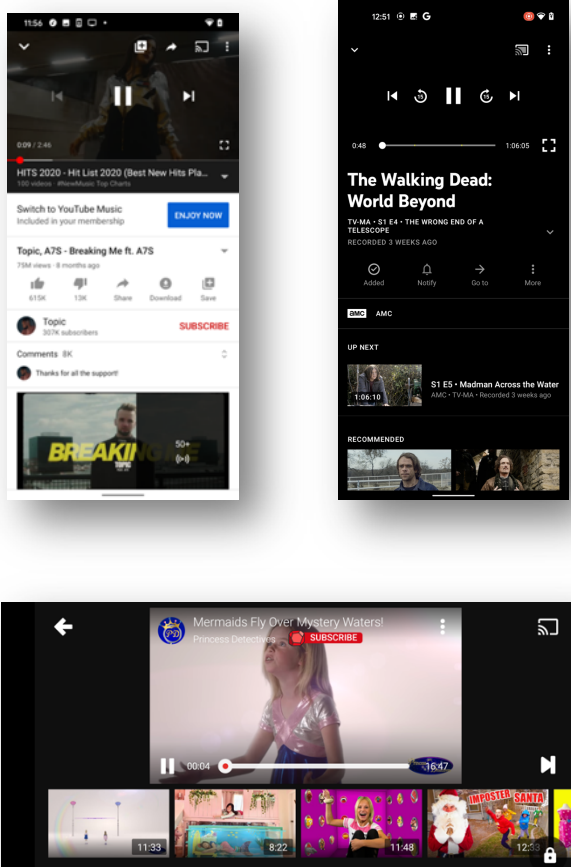

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13  | Accused Instrumentalities  |
|---|--|
| transport controls to control playback by the control device; | <p>For instance, each Cast-enabled computing device is programmed with the capability to cause its graphical interface to display a control interface having one or more transport controls that, at times, are configured to control the Cast-enabled computing device’s playback of audio content (e.g., music, podcasts, etc.) and/or audiovisual content (e.g., videos) from a streaming content service, among other media sources. <i>See, e.g.,</i> <a href="https://play.google.com/store/apps/details?id=com.google.android.youtube&amp;hl=en_US&amp;gl=US">https://play.google.com/store/apps/details?id=com.google.android.youtube&amp;hl=en_US&amp;gl=US</a> [Google Play Store – YouTube app] (“Get the official YouTube app on Android phones and tablets. . . . <sup>14</sup>

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13 | Accused Instrumentalities  |
|----------|--|
|          | <div data-bbox="489 228 1885 451" style="background-color: black; color: white; padding: 10px;"> <div data-bbox="1058 228 1203 261">“videoID”</div> <div data-bbox="1629 228 1774 261">“videoID”</div> <div data-bbox="1171 305 1476 337">“WatchNextResponse”</div> <div data-bbox="695 381 840 414">“videoID”</div> </div> <p><u>Faced with this clear evidence of infringement of claim limitations 13.5-13.6, Google has now proposed brand new constructions for the terms “resource locator” and “local playback queue on the particular playback device,” which Google appears to be pursuing for the sole purpose of attempting to avoid infringement of claim limitations 13.5-13.6.</u></p> <p><u>In particular, for the first time on January 10, 2022, Google took the position that the term “resource locator” should be construed as an “address of a resource on the Internet” and cited as support numerous dictionary definitions of the phrase “uniform resource locator” (URL). In this regard, Google apparently intends to argue that Cast-enabled computing device installed with any one of the YouTube, YouTube Music, YouTube TV, or YouTube Kids apps does not infringe limitations 13.5-13.6 under Google’s proposed construction for “resource locator” based on a theory that the “videoID” being added to a Cast-enabled media player’s local playback queue is not an “address of a resource on the Internet.”</u></p> <p><u>Sonos disagrees that this is the proper construction for “resource locator” as that term is used in the context of the ’615 Patent and will provide its position regarding the flaws in Google’s proposed construction during the claim construction process. However, even if the Court were to adopt Google’s proposed construction, Sonos maintains that each Cast-enabled computing device installed with any one of the YouTube, YouTube Music, YouTube TV, or YouTube Kids apps would still satisfy claim limitation 13.6(a) literally, or at the very least, under the doctrine of equivalents (DoE).</u></p> <p><u>As noted above, a Cast-enabled computing device installed with any one of the YouTube, YouTube Music, YouTube TV, or YouTube Kids apps functions to cause one or more [REDACTED] to send a “videoID” of a particular media item to a Cast-enabled media player, and the Cast-enabled media player then in turn uses the “videoID” to retrieve, from one or more other cloud servers, one or more URLs corresponding to the particular media item, such that the other one or more cloud servers cause the</u></p> |

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13 | Accused Instrumentalities   |
|----------|---|
|          | <p><u>Cast-enabled media player to add one or more URLs corresponding to the particular media item to its memory. Thus, by virtue of causing one or more [REDACTED] “videoID” to a Cast-enabled media player’s local playback queue, a Cast-enabled computing device installed with any one of the YouTube, YouTube Music, YouTube TV, or YouTube Kids apps likewise causes one or more cloud servers to add URLs to the Cast-enabled media player’s memory [REDACTED] – which are clearly “resource locators” under Google’s new proposed construction. For this reason, Sonos maintains that the foregoing functionality would still literally satisfy claim limitation 13.6(a) even if the Court were to adopt Google’s proposed construction for “resource locator.”</u></p> <p><u>Moreover, to the extent Google intends to argue that the foregoing functionality does not satisfy claim limitation 13.6(a) literally under Google’s proposed construction of “resource locator” based on a theory that the claims require the “control device” to <i>directly</i> cause a “first cloud server” to add a “resource locator” to the “local playback queue on the particular playback device” (which Sonos also disagrees with), Sonos contends that the foregoing functionality would still satisfy claim limitation 13.6(a) under DoE.</u></p> <div style="background-color: black; width: 100%; height: 150px; margin-top: 10px;"> <div style="position: absolute; top: 50%; left: 50%; transform: translate(-50%, -50%);"> <div style="border: 1px solid black; padding: 2px; display: inline-block;">“videoID”</div> <div style="border: 1px solid black; padding: 2px; display: inline-block; margin-left: 20px;">“videoID”</div> </div> </div> |

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13 | Accused Instrumentalities   |
|----------|---|
|          | <div data-bbox="489 228 1848 305" style="background-color: black; height: 47px; width: 100%;"></div> <p data-bbox="489 342 1896 740"><u>Also for the first time on January 10, 2022, Google took the position that the term “local playback queue on the particular playback device” should be construed as “a data structure within the particular playback device that maintains an ordered list of two or more multimedia items for playback in the listed order.” During a meet and conferral, Google stated that its use of the phrase “a data structure” in its proposed construction is intended to cover only a <i>singular</i> “data structure”<sup>15</sup> that maintains two or more “multimedia items” and exclude a scenario involving multiple data variables, each that can store a single “multimedia item.” In this regard, Google apparently intends to argue that a Cast-enabled computing device installed with any one of the YouTube, YouTube Music, YouTube TV, or YouTube Kids apps does not infringe limitations 13.5-13.6 under Google’s proposed construction for “local playback queue on the particular playback device” based on a theory that the Cast-enabled media players do not have a <i>singular</i> “data structure” that maintains “an ordered list of two or more multimedia items for playback in the listed order.”</u></p> <p data-bbox="489 781 1896 997"><u>Sonos disagrees that this is the proper construction for “local playback queue on the particular playback device” as that term is used in the context of the ’615 Patent and will provide its position regarding the flaws in Google’s proposed construction during the claim construction process. However, even if the Court were to adopt such a construction for “local playback queue on the particular playback device,” Sonos maintains that each Cast-enabled computing device installed with any one of the YouTube, YouTube Music, YouTube TV, or YouTube Kids apps would still satisfy claim limitation 13.6(a) literally, or at the very least, under DoE.</u></p> <p data-bbox="489 1037 1848 1182"><u>Indeed, as an initial matter, the “WatchNextResponse” data structure is a singular “data structure” that “maintains an ordered list of two or more multimedia items”<sup>16</sup> for playback in the listed order.” Thus, the “WatchNextResponse” data structure by itself (or in combination with one or more of the [REDACTED], and/or upNextVideoID data variables) would</u></p> |

<sup>15</sup> Google was unable to articulate what it meant by the phrase “data structure” other than to say it excludes multiple data variables collectively. Sonos disagrees and contends that the phrase “data structure” is a general phrase in computer technology that encompasses an individual data variable, a collection of multiple data variables, a data array, and other multi-data constructs, among other examples.

<sup>16</sup> To the extent that Google intends for its construction (e.g., by its use of the phrase “multimedia items”) to require the “local playback queue” to maintain multimedia content in its data form (which Sonos disagrees with), the combination of the [REDACTED] for the current and next media items alone or in combination with the aforementioned data structures satisfy Google’s construction.

|          |  <p data-bbox="1543 568 1858 600">“ItemWindowResponse”</p> <p data-bbox="735 714 1806 755">  The contents of the “ItemWindowResponse” are stored in a data structure called </p> <p data-bbox="493 1266 1543 1307">The aforementioned functionality collectively satisfies claim limitations 13.5-13.6.</p> |

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 13 | Accused Instrumentalities   |
|----------|---|
|          | <p>In this regard, Sonos contends that Google’s data structure [REDACTED]</p> <p>[REDACTED]</p> <p><u>For the first time on January 10, 2022, Google took the position that the term “resource locator” should be construed as an “address of a resource on the Internet.” While Sonos disagrees that this is the proper construction for “resource locator,” as that term is used in the context of the ’615 Patent, even if the Court were to adopt Google’s proposed construction, each Cast-enabled computing device installed with the Google Play Music app would still satisfy claim limitation 13.6(a).</u> [REDACTED]</p> <p>[REDACTED]</p> <p><u>Also for the first time on January 10, 2022, Google took the position that the term “local playback queue on the particular playback device” should be construed as “a data structure within the particular playback device that maintains an ordered list of two or more multimedia items for playback in the listed order.” While Sonos disagrees that this is the proper construction for “local playback queue on the particular playback device,” as that term is used in the context of the ’615 Patent, even if the Court were to adopt Google’s proposed construction, each Cast-enabled computing device installed with the Google Play Music app would still satisfy claim limitation 13.6(a). In this regard, Sonos contends that the [REDACTED] data structure amounts to Google’s “data structure within the particular playback device that maintains an ordered list of two or more multimedia items<sup>21</sup> for playback in the listed order.”</u></p> <p>The following exemplary evidence demonstrates that each Cast-enabled control device installed with the Google Play Music app is programmed with this functionality:</p> <p>[REDACTED]</p> |

<sup>21</sup> To the extent that Google intends for its construction (e.g., by its use of the phrase “multimedia items”) to require the “local playback queue” to maintain multimedia content in its data form (which Sonos disagrees with), the combination of data structures where the first and second next media items in their data form are stored/buffered alone or in combination with the aforementioned data structure satisfies Google’s construction.

| <p>to the local playback queue on the particular playback device.</p> | <p><a href="https://support.google.com/youtubetv/answer/7353493?co=GENIE.Platform%3DAndroid&amp;hl=en">https://support.google.com/youtubetv/answer/7353493?co=GENIE.Platform%3DAndroid&amp;hl=en</a> [Cast YouTube TV using Chromecast]; <a href="https://support.google.com/googlenest/answer/9563059?hl=en-IN">https://support.google.com/googlenest/answer/9563059?hl=en-IN</a> [Move media from one cast device to another]; <a href="https://developers.google.com/cast/docs/web_receiver/queueing">https://developers.google.com/cast/docs/web_receiver/queueing</a>; <a href="https://developers.google.com/cast/docs/ios_sender/queueing">https://developers.google.com/cast/docs/ios_sender/queueing</a>; <a href="https://developers.google.com/cast/docs/android_sender/queueing">https://developers.google.com/cast/docs/android_sender/queueing</a>.</p> <p>For example, as explained above, a Cast-enabled computing device installed with any one of the YouTube, YouTube Music, YouTube TV, or YouTube Kids app is programmed such that, after detecting a set of inputs to transfer the Cast-enabled computing device’s playback of multimedia content to at least one particular Cast-enabled media player, the Cast-enabled computing device performs a variety of functions to transfer playback from the Cast-enabled computing device to the particular Cast-enabled media player. <i>See</i> claim limitations 13.5-13.6. [REDACTED]</p> <p>[REDACTED] Watch Next server) to add one or more media-item identifiers (in the form of a “videoID” [REDACTED]) <i>See</i> claim limitations 13.5-13.6. The aforementioned functionality satisfies claim limitation 21.1.</p> <p>Sonos further incorporates by reference Google’s response to Sonos’s Fact Discovery Interrogatory Nos. 14-15, including any of Google’s documents or source code cited therein. <i>See</i> Google LLC’s First Objections and Responses to Plaintiff Sonos, Inc.’s First Set of Fact Discovery Interrogatories.</p> |
| Claim 25  | Accused Instrumentalities  |
| <p><b>[25.0]</b> A control device comprising:</p>                     | <p>Google’s “Cast” technology enables an “Android, iOS, or Web app to direct its streaming video and audio to a TV or sound system,” where the app “becomes the remote control to play, pause, seek, rewind, stop, and otherwise control the media.” <a href="https://developers.google.com/cast">https://developers.google.com/cast</a>. In Google’s “Cast” framework, there are two core categories of devices: (1) “sender” devices, which are computing devices installed with a Cast-enabled Android, iOS, Chrome, or browser-based app accessed via either an app store or Chromecast-enabled site URL<sup>37</sup> (including youtube.com, music.youtube.com, tv.youtube.com, and spotify.com), and (2) “receiver” devices, which are Cast-enabled media players such as an audio or video playback device. <i>See</i>,</p>   |

<sup>37</sup> *See, e.g.*, <https://support.google.com/chromecast/answer/3265953?hl=en>.

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 25 | Accused Instrumentalities  |
|----------|--|
|          | <p>e.g., <a href="https://developers.google.com/cast/docs/developers">https://developers.google.com/cast/docs/developers</a>; <a href="https://developers.google.com/cast/glossary">https://developers.google.com/cast/glossary</a>; <a href="https://developers.google.com/cast/docs/ux_guidelines">https://developers.google.com/cast/docs/ux_guidelines</a>.</p> <p>There are many different Cast-enabled Android, iOS, Chrome, or browser-based apps that allow a user to transfer playback of streaming media content from the user’s smartphone, tablet, or computer device to a Cast-enabled media player and then control the Cast-enabled media player’s playback using the Cast-enabled app. This includes Google’s own Cast-enabled apps, such as the YouTube Music app, the Google Play Music app, the YouTube app, the YouTube TV app, and the YouTube Kids app, as well as a host of different third-party Cast-enabled apps, such as the Spotify app. <i>See, e.g.,</i> <a href="https://support.google.com/chromecast/answer/6279384?hl=en">https://support.google.com/chromecast/answer/6279384?hl=en</a>; <a href="https://www.google.com/chromecast/built-in/apps/">https://www.google.com/chromecast/built-in/apps/</a>. These Cast-enabled apps can be installed and run on any smartphone, tablet, or computer device that supports Android, iOS, Chrome, or browser-based apps, including Google’s own “Pixel” smartphone, tablet, and computer devices (e.g., the Pixel, Pixel XL, Pixel 2, Pixel 2 XL, Pixel 3, Pixel 3 XL, Pixel 3a, Pixel 3a XL, Pixel 4, Pixel 4 XL, Pixel 4a, Pixel 4a (5G), Pixel 5, Pixel 5a (5G), Pixel 6 phones, the Pixel Slate tablet, and the Pixelbook and Pixelbook Go laptops) as well as many third-party smartphone, tablet, or computer device. <i>See, e.g.,</i> <a href="https://store.google.com/us/magazine/compare_pixel">https://store.google.com/us/magazine/compare_pixel</a>; <a href="https://store.google.com/us/product/google_pixelbook_specs">https://store.google.com/us/product/google_pixelbook_specs</a>; <a href="https://store.google.com/us/product/pixel_slate_specs">https://store.google.com/us/product/pixel_slate_specs</a>. For purposes of this chart, any smartphone, tablet, or computer device installed with a Cast-enabled Android, iOS, Chrome, or browser-based app (e.g., accessed via an app store or Chromecast-enabled site URL) that allows a user to transfer playback of streaming media content from the smartphone, tablet, or computer device to a Cast-enabled media player and then control the Cast-enabled media player’s playback using the Cast-enabled app will be referred to as a “Cast-enabled computing device.”</p> <p>As set out in the Supplemental Infringement Contentions, Sonos has endeavored to list the possible third-party smartphone, tablet, and computer devices that may have been used to download and install one or more accused Cast-enabled apps between May 2018 to present. <i>See</i> Appx. 1. Each of these third-party smartphone, tablet, and computer devices, when installed with at least one Cast-enabled app, meets all elements of the claims as explained in more detail herein. As set forth below, Sonos cites representative examples of Google smartphone, tablet, and computer devices meeting elements 25.1, 25.2, 25.3, and 25.4, but notes that the hardware aspects recited in elements 25.1, 25.2, 25.3, and 25.4 have become ubiquitous among all smartphone, tablet, and computer devices. Each possible third-party smartphone, tablet, and</p> |

**Ex. A –Infringement Contention Chart: U.S. Patent No. 9,967,615**  
**HIGHLY CONFIDENTIAL - SOURCE CODE - ATTORNEYS’ EYES ONLY**

| Claim 25 | Accused Instrumentalities  |
|----------|--|
|          | <p>computer device listed in Appendix 1 contains these aspects and thus meets elements 25.1, 25.2, 25.3, and 25.4.</p> <p>There are also many different Cast-enabled media players to which playback of streaming media content can be transferred from a Cast-enabled computing device. This includes Google’s own Cast-enabled media players, such as the Home Mini, Nest Mini, Home, Home Max, Home Hub, Nest Hub, Nest Hub Max, Nest Wifi Point, Chromecast, Chromecast Audio, Chromecast Ultra, Chromecast with Google TV, and Nest Audio media players, as well as various other third-party media players with built-in Cast functionality. <i>See, e.g.,</i> <a href="https://store.google.com/us/product/google_home_max?hl=en-US">https://store.google.com/us/product/google_home_max?hl=en-US</a>; <a href="https://store.google.com/us/product/chromecast_google_tv_compare?hl=en-US">https://store.google.com/us/product/chromecast_google_tv_compare?hl=en-US</a>; <a href="https://www.google.com/chromecast/built-in/audio/">https://www.google.com/chromecast/built-in/audio/</a>.</p> <p>Certain of these Cast-enabled media players also include a display screen and firmware that enables the Cast-enabled media players to additionally function as a control device for other Cast-enabled media players. This sub-category of Cast-enabled media players, which will be referred to herein as “Cast-enabled displays,” includes Google’s Home Hub, Nest Hub, and Nest Hub Max media players. <i>See, e.g.,</i> <a href="https://store.google.com/us/product/google_nest_hub?hl=en-US#overview-modal-music">https://store.google.com/us/product/google_nest_hub?hl=en-US#overview-modal-music</a>; <a href="https://store.google.com/us/product/google_nest_hub_max?hl=en-US">https://store.google.com/us/product/google_nest_hub_max?hl=en-US</a>; <a href="https://support.google.com/googlenest/answer/9165738?hl=en-GB&amp;ref_topic=7030084">https://support.google.com/googlenest/answer/9165738?hl=en-GB&amp;ref_topic=7030084</a>. Similar to the Cast-enabled computing devices, these Cast-enabled displays have Cast-enabled software (e.g., firmware and/or Cast-enabled apps) that allows a user to transfer playback of streaming media content from the Cast-enabled display to another Cast-enabled media player and then control that other Cast-enabled media player’s playback using the Cast-enabled display’s user interface. For purposes of this chart, Cast-enabled computing devices and Cast-enabled displays may be referred to collectively as “Cast-enabled control devices.”</p> <p>Google also hosts backend software on Cloud-based infrastructure owned and/or operated by Google (sometimes referred to as Google Cloud Platform or “GCP” for short) that facilitates the aforementioned Cast functionality for transferring playback of streaming media content from a Cast-enabled control device to a Cast-enabled media player and/or controlling the Cast-enabled media player’s playback.</p> <p>As described in further detail below, each Cast-enabled control device is a “control device” as recited in claim 25. Further, because each Cast-enabled media player is a data network device (<i>i.e.</i>, a device that is</p> |

| Claim 25   | Accused Instrumentalities  |
|--|--|
| instructions, when executed by the one or more processors, cause the control device to perform functions comprising:   |  |
| <b>[25.5]</b> causing the graphical interface to display a control interface including one or more transport controls to control playback by the control device;   | Each Cast-enabled control device's tangible non-transitory computer-readable media has instructions encoded therein that, when executed by a Cast-enabled control device's one or more processors, cause its graphical interface to display a control interface including one or more transport controls to control playback by the Cast-enabled control device. <i>See</i> claim limitation 13.1.                                   |
| <b>[25.6]</b> after connecting to a local area network via the wireless communication interface, identifying playback devices connected to the local area network; | Each Cast-enabled control device's tangible non-transitory computer-readable media has instructions encoded therein that, when executed by a Cast-enabled control device's one or more processors, cause that Cast-enabled control device to, after connecting to a local area network ("LAN") via the wireless communication interface, identify Cast-enabled media players connected to the LAN. <i>See</i> claim limitation 13.2. |
| <b>[25.7]</b> causing the graphical interface to display a selectable option for transferring playback from the control device;                                    | Each Cast-enabled control device's tangible non-transitory computer-readable media has instructions encoded therein that, when executed by a Cast-enabled control device's one or more processors, cause its graphical interface to display a selectable option for transferring playback from the Cast-enabled control device. <i>See</i> claim limitation 13.3.  |
